Introducing Lenovo's first mainstream Edge All-in-One (AIO) with spectacular features for performance, productivity, and space saving. The Edge 71z delivers a competitive low price specifically designed for SMBs. The ThinkCentre Edge 71z continues the stylish fashion of the Lenovo Edge series, and includes reliability features and space savings to reduce costs. The Edge 71z liberates crowded offices from bulky desktops with tangled peripheral cables. This sleek and powerful AIO is set to enhance your business with class.

**Elegant:** Traditional desktops demand a lot of space and clutter offices, making multiple desktops a nightmare to maintain. The Edge 71z brings desktop-level productivity to the workplace while saving on space, more than even an ultra-small form factor. Place the Edge 71z on its feet, mount it on a wall, or swing it on an arm – it fits any work environment.

**Efficient:** The Edge 71z AIO delivers performance in a compact form, allowing SMBs to do even more. With up to Intel® Core i7 power efficient processors, you get the benefit of greater computing power with lower energy consumption. This performance is complemented by the optional SSD and up to 8 GB of memory adding both stability and speed. The Edge 71z is more eco-friendly than its predecessors enabling greater energy savings. Also the Edge 71z's reduced packaging contents means less material waste and lower environmental impact.

**Convenient:** Delivering superior productivity, the Edge 71z includes a 20" display for stunning, high-resolution visuals, along with an optional digital Display Port for Dual Independent Display. A safer spill-proof wireless keyboard slides under the AIO and the rubberized handle makes moving the PC from one location to another a hassle-free experience.
