MOTIVATED BY GOALS. POWERED BY THINKPAD.

lenovo® FOR THOSE WHO DO.

Lenovo® recommends Windows® 7 Professional.

PAINSTAKINGLY ENGINEERED FOR THOSE WHO ROLL UP THEIR SLEEVES AND MAKE THINGS HAPPEN.

From thin, light and gorgeous to solid, hard-working and reliable, the legendary ThinkPad® notebooks are engineered for those who DO. Equipped with time-saving, productivity-boosting ThinkVantage® Technologies, Think-branded PCs help save money in the long run. Making them DO machines you simply can't do without.

BUILT TOUGH

• ROLL CAGE TECHNOLOGY

A magnesium roll cage protects ThinkPad notebooks from shocks, falls and crashes.

• ACTIVE PROTECTION SYSTEM™

Like an airbag, the Active Protection System™ protects a ThinkPad notebook by detecting drops, knocks, shocks and bumps and then freezes the hard disk drive to prevent damage.

• HARD/STORAGE DRIVE IMPACT PROTECTION

A rubber isolator and metal cage protect the hard disk drives of a ThinkPad notebook from bumps and knocks that occur in day-to-day usage.

• MILITARY SPECIFICATION TESTING

ThinkPad notebooks have passed 8 Military Level robustness tests, which include heat, cold, dust, vibration, thermal shock, mechanical shock, humidity and altitude. So taking on the daily wear and tear in your business is a cinch.

PROTECT YOUR DATA

• COMBINED HARDWARE/SOFTWARE SECURITY

Trusted Platform Module, Client Security Solution and Integrated fingerprint reader form a seamless integrated security package on ThinkPad notebooks to protect data and guard against unauthorised access.

• INTEGRATED FINGERPRINT READER

Now users may access their password-protected system and manage all their security features with a simple swipe of the finger.

• PASSWORD MANAGEMENT SOFTWARE

Password Manager lets users store various passwords for safekeeping and is a solution that can be tied into the optional Integrated fingerprint reader to enhance security.

• BACKUP AND RECOVERY TOOLS

All ThinkPad notebooks feature ThinkVantage Rescue and Recovery®—a robust system-backup and recovery tool to help preserve data.

STAY CONNECTED ANYWHERE

• MOBILE BROADBAND

Mobile broadband lets users stay online through a mobile network connection provided by a third-party mobile phone carrier. Without the hassle of using external dongles that are bulky, easy to damage and easy to lose.

• NETWORK CONNECTION SOFTWARE

With ThinkVantage Access Connections™ software, users can switch between wired and wireless connection settings with ease. It also has security and customisation options that include location based default printer selection, VPN launch and homepage setting.

PERFORMANCE 24x7

• VOICE OVER IP (VoIP)

The ThinkPad T and W Series notebooks feature dual digital microphones to enhance voice quality and reduce background noise.

• LENOVO® ENHANCED EXPERIENCE FOR WINDOWS® 7

All ThinkPad notebooks feature Lenovo Enhanced Experience for Windows® 7 to enable faster boot-up and shutdown.

• FULL-SIZED, ERGONOMIC KEYBOARD

ThinkPad notebooks come with a full-sized, ergonomic keyboard to make typing comfortable.

• ULTRANAV® MULTI-POINTING SYSTEM

The UltraNav® multi-pointing system combines the red TrackPoint® button with the UltraNav® touchpad and mouse/scroll buttons for greater flexibility.

• MULTITOUCH TOUCHPAD

With two-finger gestures, the multitouch touchpad helps users rotate, zoom in and out and scroll images with ease. It also comes with a 27% increased usage area and a new texture for convenience and comfort.

• MULTITOUCH PANEL

The multitouch panel on ThinkPad X220 tablet models features a 270 nit display; one and two-finger gestures to pan, zoom, rotate, right-click; and enhanced sensitivity and accuracy for greater usability.

ENGINEERED GREEN

• ENERGY STAR™ COMPLIANT

ThinkPad notebooks are high on energy efficiency, leading to lower operating costs and reduced heat emissions. Another fact that makes them more environment-friendly.

• LED BACKLIT DISPLAYS

LED backlit displays used on ThinkPad notebooks are thinner, lighter and use less power than traditional notebook displays, while still providing greater brightness for easy viewing.

• ENVIRONMENTAL LEADERSHIP

Cushions used in transit for ThinkPad notebooks are made of 100% recycled materials. One of the many initiatives taken to minimise our environmental footprint.

• COOL AND QUIET

Third-generation fan and Adaptive Thermal technology combine to keep ThinkPad notebooks cool and quiet.

• LENOVO BATTERYSTRETCH

Lenovo BatteryStretch allows users to stay more productive by minimising refresh rates and disabling wireless radios and Bluetooth® options to extend battery life by up to 15%.
