Service Guarantee

Business moves quickly and so do your people. In today's world of technology, data can be accessed and shared 24 hours a day from just about any location. So how well can you account for your corporate IT assets? And what about the data they hold? Failure to monitor and control this part of your business can lead to data breach penalties – and even worse, the type of negative publicity that can take years to repair.

Computrace® for Lenovo allows you to centrally manage your IT assets within a single interface – where you can identify any computers that have gone missing, enforce software policies, and maintain a fleet of optimally running devices. And in the event of loss or theft, Computrace for Lenovo can help you recover your computer.

Manage

Monitor and manage all of your IT assets within the Absolute Customer Center (regardless if a device is on or off your network).

Protect

In the event of loss or theft, remotely delete all sensitive information and generate reports to prove your compliance with government and corporate regulations.

Recover

Report a theft and engage the Absolute Theft Recovery Team who will work with local law enforcement to recover your property.

Guaranteed!

Receive up to \$1000, if we are unable to recover your computer.

How It Works

The Computrace Agent is embedded in the firmware of many Lenovo computers at the factory. Or you can easily install it yourself. The Agent is incredibly persistent and allows you to maintain a connection with all of your computers regardless if they are off the network and even if the hard drive is completely reformatted or replaced. Once the Agent is activated – your Lenovo computers (and everything on them) are protected.

Asset Administration

The Absolute Customer Center is a cloud-based interface where you can manage your entire deployment regardless if a device is on or off your network. Collect incredibly accurate and comprehensive information from each device, then create customized policies and alerts so you can be notified as soon as an unauthorized change is detected. Asset information includes user identification, physical location, and the installation of software/hardware that may not comply with government and corporate regulations.

Data & Device Security

Remotely delete sensitive data on missing computers and produce an audit log of the deleted files to prove compliance with government and corporate regulations. Device Freeze allows you to freeze a computer and display a custom message to the user instructing them to comply with specific requests for action (return for servicing, validate user identity, etc.). Remote File Retrieval allows you to obtain files from a device even if it is not within your control.

FOR ENDPOINT SECURITY

Geotechnology

Use GPS (if the device is equipped with a receiver) or Wi-Fi technology to track your assets on an internet map including current and historical locations. Build predefined areas (geofences) and receive alerts if a condition occurs such as a device remaining outside a boundary beyond a set measure of time. Use the physical location of a device to investigate and determine if further action is required.

Customer view of IT assets within Absolute Customer Center, with geofencing enabled.

System Requirements

PC

- Windows® 7™ (32 & 64-bit versions)
- Windows® Vista™ (32 & 64-bit versions)
- Windows® XP® (32-bit only)
- Windows® 2000
- Windows® Server 2008
- Windows® Server 2003
- Internet connection

Absolute Customer Center

- Windows® Internet Explorer®
- Mozilla Firefox 3 or above

Theft Recovery

If your computer is stolen, the Absolute Theft Recovery team will work with local police to locate it and return it to you. We recover thousands of computers each year.

Service Guarantee

You will be eligible to receive up to \$1000, if we are unable to recover your computer or perform the data delete service. Some conditions apply.

Lost and Found

Reunite with your lost notebook! Lenovo Lost and Found provides an easy way for good samaritans to help you reconnect with a lost device. Program information is applied to the shell of the notebook. Or you can leverage Computrace to freeze the device and direct the finder to the Lost & Found website explaining how to return the machine to Lenovo, who in turn will send it to the registered owner. Lenovo covers all shipping costs.
