

Lenovo® recommends Windows® 7 Professional.

THE NEW THINKCENTRE M91p IS EVERYTHING A BUSINESS MANAGER SHOULD BE.

- Consistent reliability
- No-compromise performance and productivity
- Highest standards of security
- Time-saving management capabilities

The new Lenovo ThinkCentre® M91p, powered by the Intel® Core™ i7 processor is equipped with the highest standards of manageability, energy efficiency and data security. Read on to see how this powerful machine can benefit your business.

lenovo®

Lenovo® recommends Windows® 7 Professional.

High-performance features for productivity and value

- Includes Intel® Core™ i CPUs with Hyper-Threading and Turbo Boost 2.0 for fast performance and powerful multi-tasking.
- Best graphic capability that is 5x better than the M90/M90p.
- Boots up in all of 35 seconds with Lenovo Enhanced Experience for Windows® 7
- Supports up to 4 Independent Displays (with discrete graphics card).

Optimum manageability

- Preloaded Lenovo ThinkVantage® Technologies take the stress out of PC management.
- Intel® vPro™ with Active Management Technology (AMT) 7.0 support makes PC fleet management easier.
- Tool-less design for easy expandability reduces IT management expenses.

Robust security features

Lenovo exclusive Hardware Password Manager

- The Hardware Password Manager provides central management of keys and passwords for self-encrypting hard disk drives.
- It is the only solution available to manage all brands of self-encrypting hard disk drives.
- It simplifies matters for administrators and users who don't know their real hard disk drive or BIOS passwords.
- HPM facilitates easy recovery of data in case of lost passwords or if the employee leaves the company.
- It enables full hard disk drive encryption with native Windows® password management and reset, and is easy to use and implement.

Individual USB enable/disable feature

- This feature prevents unauthorized data copy and virus threats from USB peripherals.

Complete eco-friendly features for your global PC fleet

- Full compliance with GREENGUARD® and ENERGY STAR™ standards (select models).
- Power Manager™ software reduces power consumption and increases savings on energy bills.
- The M91p uses up to 42% recycled plastic which is equivalent to 17 recycled plastic bottles for each ThinkCentre M91/M91p unit.

Easy to Deploy, Expand and Trust

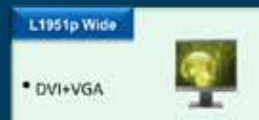

- Provides a 15-month platform stability that enterprises need.
- Offers a tool-less chassis for easy maintenance and expandability.
- Has been tested rigorously for reliability by undergoing high voltage, shock, vibration and drop tests.
- While continuous thermal improvements mitigate the risk of failure from overheating.
- Lenovo Asset Recovery Service simplifies the transition from old to new PCs with a one-source, replacement solution.

Award-winning base warranty, service and support

- IT departments get faster access to Lenovo's ThinkPlus® Priority Support for PC hardware and software related issues.
- IT management tools help to maximize helpdesk productivity while managing overhead costs.
- Users can bypass basic troubleshooting; experience shorter hold times, reduced repair times and higher first-time fix rates. That way, your IT team can concentrate on more critical business matters.
