

Lenovo® recommends Windows® 7 Professional.

BUILT FOR RECORD-BREAKING ENDEAVOURS.

ThinkStation workstations power the North American Eagle project to develop the world's fastest jet-propelled automobile. See how these incredible machines can take your business further.

Lenovo ThinkStation D30 powered by the Intel® Xeon processor.

lenovo® FOR
THOSE
WHO DO.

UNLEASH THEIR POTENTIAL.

Lenovo ThinkStation workstations, with high-end and 3D graphics solutions and dual-CPU systems are massive productivity-enhancers.

To design and build the world's fastest jet-propelled vehicle, as well as engineer the programs and processes critical to its success, the North American Eagle team relies on the Lenovo ThinkStation as its key tool. Imagine the might of this powerful machine behind your clients' businesses!

Computing power

ThinkStation workstations are loaded with the latest Intel® processors (Xeon® CPUs with Turbo Boost Technology). They are fast, but they're also designed for intelligent performance and energy efficiency. They make automatic adjustments based on usage. Responsiveness is boosted up with as many as 12 DIMM slots on select models. For those who need it, portable workstation power is also available.

Graphics

Select ThinkStation workstations integrate NVIDIA® Quadro® professional graphics with SLI technology, the Tesla™ high-performance computing solution. We also support up to a whopping eight monitors simultaneously.

ISV certifications

Lenovo works closely with leading software partners. ThinkStation workstations have received hundreds of independent software vendor (ISV) certifications, ensuring you get the performance you need to run the world's most demanding applications.

Clever, quiet design

ThinkStation processors deliver speed and power at nearly undetectable operating noise levels. A hundred little innovations from tool-less chassis access and clean cable management to side cover latches and easy rack mounting — every ThinkStation design detail is carefully thought out. We paid special attention to the cooling system, and lowered idle noise to a nearly undetectable 24 decibels.

Benefits of the ThinkStation

- Recessed power button - No more losing work to your restless leg syndrome
- Back lit ports - You can see them under your desk and find the right port
- Built-in handles - 40lbs was never so light
- Wide space between USB ports - Everyone gets larger eventually
- Extremely quiet - less than 37 decibels
- Cooler - Active channel cooling to keep your asset running longer
- Very Green - Made from more than 50% recycled plastics, Energy Star etc.

ThinkStation E30

THE POWER OF A WORKSTATION FOR THE COST OF A DESKTOP.

An upgrade from desktop to the ThinkStation E30 offers enhanced performance and graphics capabilities. Meet the Lenovo ThinkStation E30, a power-packed workstation with beyond-desktop attributes in reliability and performance. The E30 is equipped to meet specialized needs such as coding and compiling business applications, designing graphics, 3D modeling and producing engineering designs. As a bonus, the E30 is a green champ with all the right certifications, and is super quiet, emitting just 24dB of idle operating noise (normal office noise falls between 50 and 60dB). Large cooling fans keep these systems hushed and undetected.

TOP FEATURES:

- New Intel® Xeon® CPUs deliver efficient and unmatched performance
- Advanced graphics technologies, including the NVIDIA® QUADRO® line, supporting SLI on select D Series configurations, and ATI® FirePro® graphics
- At 24db, the idle operating noise level is nearly undetectable
- EPEAT® GOLD and GREENGUARD® certified

OPTIONS

NVIDIA® Quadro® 600 GPU (0A36183) - \$159

Maximize productivity and conserve energy with the best performance per watt in its class. Breakthrough NVIDIA Fermi architecture accelerates professional work flows and integrates advanced visualization and compute features.

L2251p 22" Wide Screen monitor (2572HD6) - \$260

Great for multi-monitor configurations, it enables you to be environmentally friendly without compromising performance.

ThinkStation S20

**SPEND LESS TIME WAITING.
AND MORE TIME CREATING.**

The exceptionally quick ThinkStation S20 is engineered for professional users of graphically intensive applications.

The ThinkStation S20 is built for those who require a level of performance unattainable with a standard desktop computer. It sports a groundbreaking design and speeds through graphically and computationally intensive projects. Loaded with a wide range of NVIDIA® graphics cards, they have a wealth of cache and multiprocessing capabilities that run more demanding programs. Just what your customers need to bring their ideas and innovations to life faster.

TOP FEATURES:

ThinkStation C20

TAKES UP LESS SPACE, BUT GIVES YOUR CUSTOMERS MORE POWER.

The ThinkStation C20 is the world's smallest dual-CPU workstation, with no compromise in performance. Don't let the size fool you. Inside the compact exterior is a workhorse that can handle your toughest tasks. Intel® Xeon® processors with Turbo Boost Technology kick in additional performance during peak processing. The C20 supports up to a 130-watt CPU, which drives faster clock speeds so you can do more and do it faster. It can also house up to 12 DIMMs, delivering plenty of memory for exceptional responsiveness. This high performance, dual-CPU workstation allows your customers to fit in more capabilities in restricted spaces.

TOP FEATURES

- World's smallest dual-CPU workstation, featuring Intel® Xeon® 5600 series processors
- Up to 12 DIMM slots, delivering unmatched memory capacity
- Quick and easy tool-less maintenance and upgrades
- Fits up to 14 workstations in a 42U rack
- Cool and quiet technology, featuring tri-channel cooling
- Environmental champion of its class with an 80 Plus Gold power supply and recycled plastics usage

ThinkStation D20

POWERS THE DEVELOPMENT OF THE WORLD'S FASTEST JET-PROPELLED AUTOMOBILE.

Lenovo's powerhouse machine, the ThinkStation D20 is the choice of the North American Eagle team, in their pursuit of a dream to build the world's fastest jet-propelled automobile. Not surprising, because this highly-expandable dual-processor computational machine is ideal for the most demanding applications in CAD/CAM/CAE, 3D digital content creation and professional video editing. Your customers can count on the reliability and muscle of these workstations to blaze through intense applications. They are built to analyze more, create more, deliver more, and earn more — faster.

TOP FEATURES

- New Intel® Xeon® CPUs on both S and D series workstations deliver unmatched performance with incredible efficiency
- Expandability that's unattainable on a desktop PC
- Dual PC x16 Gen 2 graphics slots (7 expansion slots)
- With up to a 1060W power supply it delivers all the juice your key components need to maintain peak performance
